ABSTRACT

Education and training on integrated pest management (IPM) of CVPD (*Citrus Vein Phloem Degeneration*) was held at Pelaga village, Badung regency on 22 September 2005. The activities aimed to improve knowledge of the farmers about CVPD and factors influencing the intensity, insect vector and integrated pest management of CVPD. The topics covered were disease symptoms, and pathogen bacteria, *Diaphorina citri* as vector insect infection mechanism, disease distribution and integrated management of CVPD. The training was attended by 26 participants from local groups of Pelaga village. The method used in activities were lectures, demonstration and practical work in the citrus field. All participants enthusiastically took part and hoped to have the next intensive training of citrus culture.

Key words : Education, training, IPM, CVPD.
